Introduction

This volume contains a description and analysis of the semi-official medals and decorations issued within the Austrian and later Austro-Hungarian Empire other than those made for the collector trade or for commercial purposes. This will include medals issued by entities other than the central Austrian or Austro-Hungarian government so long as they are directly related to the military mission of the government. This volume on semi-official medals will describe medals issued by entities other than the emperor to military or civil officials, by municipalities such as cities and cantons, by military units, by societies such as the Red Cross and the War Help Bureau and by veteran societies. The exception will be the official Red Cross decorations which were issued by the central government and will be addressed in the volume on decorations. Thus the reader can expect to find in this section of this volume a description of semi-official awards issued by Austrian Societies.
